

PURA VITA CLEANING GUIDELINES

To ensure that you get the best long-term performance and enjoyment from your **PURA VITA** surface, please follow the cleaning recommendations provided in this document.

We strongly recommend cleaning the **PURA VITA** surface immediately after soiling by wiping a cloth previously dampened in a solution with 2-3% of common dish washing liquid. After application, we recommend always drying the surface with a soft and clean cloth in order to remove any ring left.

TOUGH HARD TO REMOVE STAINS

In cases where there are greasy stains, we recommend using universal degreaser detergent.

e.g.: "MARSIGLIA CHANTECLAIR"

If the dirty is only partially removed, repeat the procedure.

NOT RECOMMENDED

(Please avoid using any of these)

- Abrasive cleaning materials and accessories such as steel wool, stainless steel scrubbing pads, and sponges with an abrasive surface such as Scotch Brite.
- Abrasive creamy cleaners and cleaning powders.
- Pointed or sharp objects such as blades, knives and scrapers.
- Strong concentrated acids/alkali.

Furthermore, do **NOT** use ammonia, bleach, acetone and alcohol.
